UPPER COLUMBIA BASIN FLOOD CONTROL AND FISH OPERATIONS AT LIBBY DAM, HUNGRY HORSE DAM AND GRAND COULEE DAM DRAFT ENVIRONMENTAL IMPACT STATEMENT SCOPING PROCESS PUBLIC COMMENT FORM

This form is being provided to assist you in offering your comments during the Upper Columbia Basin Flood Control and Fish Operations DEIS scoping process. Please fill out all or part of the form (as appropriate), or you may elect not to use the form and submit your comments in writing by regular or electronic mail. In addition, you are requested to forward any information you feel will assist the US Army Corps of Engineers and the Bureau of Reclamation in conducting a thorough and accurate analysis of the Upper Columbia Basin project. Please refer to the US Army Corps of Engineers' Notice of Intent for this project in the October 1, 2001 Federal Register for background information about the project, alternatives, scoping process, issues identified to date, public involvement and request for information, and project schedule. Public meeting dates and times can be verified by visiting www.nws.usace.army.mil/ers/varq_web.htm.

PLEASE SEND ALL COMMENTS AND MATERIALS TO:

Evan Lewis, US Army Corps of Engineers, Seattle District Environmental Resources Section PO Box 3755 Seattle, Washington 98124-3755 Phone: 206.764.6922

Email: evan.r.lewis@usace.armv.mil

1. What comments do you have regarding significant environmental issues associated with the Upper Columbia Basin Flood Control and Fish Operations project?

2. What comments do you have regarding significant social and economic issues associated with the Upper Columbia Basin Flood Control and Fish Operations project?

	What are the benefits of the Upper Columbia Basin Flood Control and Fish Operations project? What are your concerns?
	What information/resources (studies, people) are you aware of that could assist us the Corps of Engineers and Bureau of Reclamation in properly evaluating the Upper Columbia Basin Flood Control and Fish Operations project?
	Are there reasonable alternatives, other than existing operations (no action) and VAR-Q (variable flow) called for in the US Fish and Wildlife biologic opinion that have already been identified, which you feel should be evaluated in the Upper Columbia Basin Flood Control and Fish Operations project DEIS?
	What else would you like to tell us about the Upper Columbia Basin Flood Control and Fish Operations project?
